FISCAL YEAR 1969 — 1970

Walter F. Young

Sheriff-Coroner

I N T R O D U C T I O N

These data present a statistical record of the problems and occurrences requiring the services of this department during the fiscal year of 1969 - 1970. All of these services are rendered for only five percent of the total county budget.

Burglaries still remain the most serious felony violation. Good police patrol can control commercial burglaries, but does not have much effect against the residential burglar. As previously stated, public support, legislation, and judicial attention, as well as more expenditures for police investigative personnel, are needed to control this problem.

The relation between law enforcement officers and the communities is one of dependence. We will continue to exert our best efforts on their behalf.

The newest delinquency prevention program initiated this school year, after a pilot program at Juan Crespi and Stanley Schools, is the "Officer on the Campus". Because of its success at these schools, we have enlarged the program to cover twenty-two elementary and junior high schools in the county area. The regular beat officers stop periodically at the various schools, spending ten to fifteen minutes during recess, mingling and talking with the students. This is a cooperative effort between school administration, faculty, and our department, attempting to develop better understanding between students and law enforcement officers with hopes of deterring narcotic and drug trafficking, non-student loitering, and other problems peculiar to school areas.

The Criminalistics Laboratory is responsible for the analysis, identification and interpretation of various items of physical evidence submitted in connection with crimes. The laboratory provides this service for all of Contra Costa County, including municipalities as well as unincorporated County areas.

The total number of requests received by the laboratory decreased during the 1969-70 fiscal year. This decrease resulted from expanded efforts by local law enforcement in fingerprint processing. While a decrease was experienced in total requests for services, an actual increase of approximately 7% was experienced in requests requiring the examination of physical evidence by chemical, microscopic and instrumental means. Involvement of the criminalists in judicial proceedings was markedly increased during the year.
